Nigel GRAY MB BS FRACP

It is the Australian, Dr. Gray, who appears to have done more than any other individual to bring the anti-tobacco movement together in the international sense, to exert pressure on governments and other influential bodies. Active in the Australian anti-smoking movement since before 1970, the experience he gained with organising the voluntary work of the Victorian Anti Cancer Council clearly showed both the potential and the limits of national volunteer organizations (see his speech at the Third World Conference). Starting with the seminal 'Workshop on Smoking & Lung Cancer' in 1976 (which was the first time GRAY, DAUBE, BJARTVEIT, RAMSTROEM & MASIRONI met together in a formal sense), he therefore began to work with and through the UICC as a flexible and single-minded international association, setting in motion the chain of events which has led to the formation of an International Liaison Group on Smoking and Health with himself as Chairman. The UICC Workshops were his idea, and also the Programme on Smoking and Cancer, with what are virtually Regional Co-ordinators for specific areas; he edited the first & second versions of "Guidelines on Smoking Control". He has done his share of speaking at meetings, of course, but his special contribution is to organise the integration of the disparate elements of the anti-tobacco movement into the most organic whole that it could be, short of being one big centralised body.

June 1975	Third World Conference on Smoking & Health, New York. Speaker. In the participants' list his title was given as Director, Anti-Cancer Council of Victoria, which is apparently his preferred designation. As early as 1972 Dr. Gray was already claiming that 90% of all lung cancer deaths were caused by smoking.
1976	UICC Workshop on Smoking & Lung Cancer, Geneva. Chairman. (This meeting produced the report "Guidelines for Smoking Control" edited by Gray with Mike Daube).
1978	UICC World Cancer Conference, Buenos Aires Speaker
1978	Appointed Chairman of UICC Special Project (now Programme) on Smoking & Cancer
1979	WHO Expert Committee on Smoking Control, Rapporteur. (This committee produced the report TR 636 "Controlling the Smoking Epidemic")
June 1979	Fourth World Conference on Smoking & Health, Stockholm Speaker
